

Sohel Firoj Shaikh

Pune, Maharashtra | +91-8411879889 | sohelfshaikh@outlook.com | linkedin.com/in/sohel-f-shaikh | example.com

PROFESSIONAL SUMMARY

Data Analyst with a strong foundation in statistics, Python, SQL, Excel and Power BI. Experienced in analysing data, building predictive models, and creating insights that support informed business decisions. Committed to delivering accurate, scalable, and data-driven solutions.

TECHNICAL SKILLS

Languages & Querying : MySQL, Python

Libraries & Frameworks: Pandas, Numpy, Matplotlib, Seaborn

Tools & Platforms: Power BI, Excel, Git & GitHub, Google Colab, Jupyter Notebook

Statistical Methods: Hypothesis Testing, Regression, PCA, Clustering

EXPERIENCE

Mathematics Subject Matter Expert — Freelance

2020 – 2023

Chegg.com

Remote

- Solved 398 mathematics problems across secondary and undergraduate level topics including algebra, calculus, statistics, and probability for an international academic platform.
- Maintained quality standards through Chegg's expert vetting and peer-review process across freelance engagements over three years.
- Developed ability to explain quantitative concepts clearly in written form under time and accuracy constraints.

PROJECTS

ChurnLens: Analysing and Predicting Customer Attrition

2024 - 2025

M.Sc. Final Semester Project | Python, Pandas, Numpy, Seaborn, Scikit-learn, Lifelines

- * Analysed 165,000+ banking customer records to identify key drivers of customer attrition.
- * Detected and resolved multicollinearity using Variance Inflation Factor (VIF); applied PCA to reduce 4 correlated features into 3 principal components, improving model reliability.
- * Built Logistic Regression and XGBoost classification models; improved churn recall from 35% to 79% using SMOTE to address class imbalance in a heavily skewed target variable.
- * Segmented 165,000+ customers into 3 behavioural clusters using K-Means, identifying a high-risk group with a 29.3% churn rate enabling targeted retention strategy recommendations.
- * Applied Kaplan-Meier survival analysis and Log-rank tests across 5 categorical variables to assess time-based churn patterns.

EDUCATION

Government Vidarbha Institute of Science and Humanities

Master of Science in Statistics

Aug 2023 - June 2025

Savitribai Phule Pune University

Bachelor of Science in Statistics

Aug 2019 - May 2022

CERTIFICATIONS

Python 101 for Data Science by IBM SkillsBuild

Data Preprocessing with NumPy by 365 DataScience

SQL by 365 DataScience

Data Analyst in Power BI by datacamp

Git and GitHub by 365 DataScience

The Excel Bootcamp: Zero to Mastery

Advanced Excel Bootcamp: Data Analytics and Business Intelligence
